easy insight into energy flows™

Index

ICONS EXPLAINED

- DRY AIR
- SATURATED AND HOT AIR

- PIPE DIAMETER ≤ 2"
- PIPE DIAMETER > 2"
- PIPE DIAMETER ≈ 3/8"

- 4..20 MA
- PULSE
- ETHERNET
- RS485 (MODBUS RTU)
- ALARM

- FLOW
- PRESSURE
- TEMPERATURE
- TOTALIZER
- BI-DIRECTIONAL
- DATALOGGER

- THERMAL MASS FLOW
- ΔP DIFFERENTIAL PRESSURE

- TEMPERATURE -70..60°C
- TEMPERATURE -94..140°F
- TEMPERATURE -100..20°C
- TEMPERATURE -148..68°F

- WATER RESISTANT
- DIRT RESISTANT

- GAS CORRECTION
- PRESSURE UPGRADE 35 BAR

About VPInstruments

easy insight into energy flows

VPInstruments delivers Energy Management Solutions for compressed air and industrial gases, including oxygen, nitrogen, CO_2, helium, and argon. Developed by experienced, involved experts, based in Delft, the Netherlands.

We believe that industrial energy monitoring should be easy and effortless to enable insight, savings and optimization. We show you where, when and how much you can save using our innovative and reliable products. Our solutions cover both the supply and demand side. We promise fast, reliable and easy to use products. How? We determine the entire process from design to realization and we control the entire production and calibration process.

ENERGY MANAGEMENT SOLUTIONS

For compressed air, oxygen, nitrogen, CO_2, helium, argon,
and other industrial gases

VP INSTRUMENTS
Applications

> Compressed air audits
> Energy monitoring
> Leakage management
> Efficiency monitoring
> Cost allocation
> Maintenance management

Benefits

> From supply to demand side
> Easy-to-use
> Innovative and reliable
> Versatile interfacing

easy insight into energy flows™

❶ Monitoring

Easy and effortless to enable insight, savings and optimization. Real-time energy monitoring for all your utilities. On-premise data storage with a web-based interface, automated reports with e-mail function and alarm messages. Flexible and scalable.

❷ VPFlowScope flow meters

For dry and saturated air, from supply side to demand side. 4-in-1 sensors: bi-directional flow, pressure, temperature, totalizer. Solutions for air audits and for permanent installation. Measure compressed air and industrial gases.

❸ Power

Easy insight into power consumption. Permanent and mobile solutions. Measure up to all 3 phases. General purpose power measurement; monitor compressor efficiency; measure other large electrical consumers.

❹ Dew point

Safeguard your equipment and production process. Monitor the air quality of both refrigerant and desiccant type air dryers. Measure compressed air and industrial gas. Robust, smart and with autocalibration functionality.

VPFlowScope flow meters for compressed air and industrial gases

We designed our flow meters to be easy to use, affordable and complete. You can use our flow meters for measurement of compressed air, nitrogen, oxygen, helium, argon and other industrial gases.
The VPFlowScopes incorporate the 4-in-1 measurement principle: flow, pressure, temperature and total flow. Moreover, these flow meters can measure bi-directional flow, which is optional on our thermal mass flow meters with our proprietary Thermabridge sensors, and standard on our differential pressure flow meters. The VPFlowScope In-line 3/8" is a simpler device, which measures flow, temperature and total flow of compressed air and oxygen.

Let's start
by selecting a flow meter!

For the complete VPFlowScope selection tool, please go to www.vpinstruments.com

What air quality?

Wet air (before dryer)

Dry air (after dryer)

What pipe diameter?

Ø ≤2"

Ø >2"

VPFlowScope

DP

In-line

Probe

M

Supply side
- Wet air
- High velocity

VPFlowScope **DP**

VPFlowScope **Probe/M/In-line**

Demand side
- Dry air
- Low to medium velocity
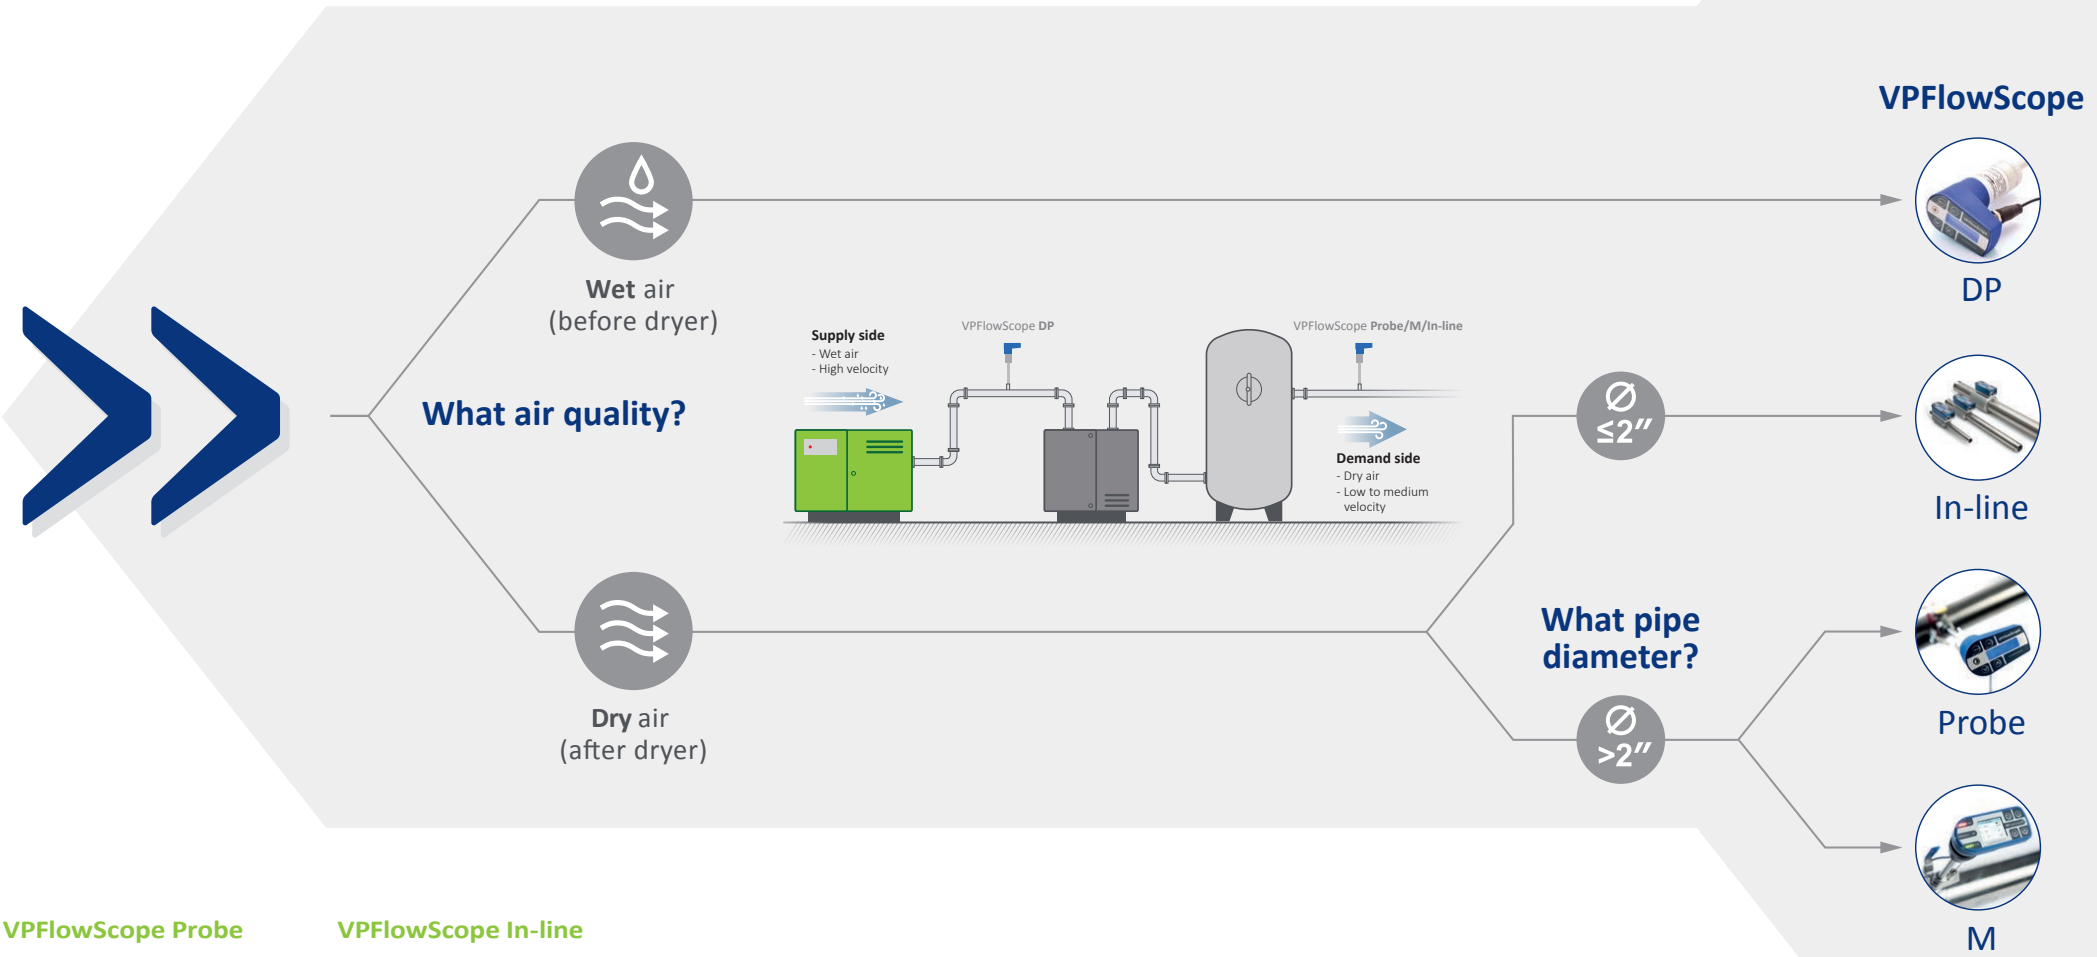

VPFlowScope DP
The patented VPFlowScope® DP enables you to take measurements in the discharge pipe of a compressor under 100% saturated conditions. Combine the VPFlowScope DP with a power meter and measure compressor efficiency.

VPFlowScope M
The VPFlowScope® M is the next step in gas measurement. Unlike traditional flow meters, the VPFlowScope M consists of a Transmitter and the patented VPSensorCartridge® which reduces recalibration to a simple exchange.

VPFlowScope Probe
The VPFlowScope® Probe is the measurement tool for dry compressed air and other technical gases like nitrogen, carbon dioxide and argon.
The VPFlowScope Probe measures thermal mass flow, pressure, temperature and total flow simultaneously.

VPFlowScope In-line
The VPFlowScope® In-line is the ideal flow meter for point of use consumption measurement. It is perfect for smaller diameters where it produces all the data you need to optimize your compressed air consumption.

VPFlowScope DP

The ultimate tool for saturated and hot compressed air measurement

OPTIONAL

The patented VPFlowScope® DP is the ultimate measurement tool for saturated compressed air flow measurements. This differential pressure flow sensor measures bi-directional flow, pressure, temperature and total flow simultaneously. Its unique design enables you to take measurements in the discharge pipe of any compressor under 100% saturated conditions. With the VPFlowScope DP you can measure the performance or efficiency of your compressor. Furthermore, you can measure compressor contribution of the total compressed air supply.

The VPFlowScope DP is an insertion type flow meter, so you can use one device for various pipe diameters. The bright blue LCD display provides real-time information and with the built-in data logger, you can record for certain periods of time. Combine this with our VPStudio software on your PC and you can use this information to process data, print reports and analyze where and how exactly you can save.

Highlights

> For saturated compressed air measurements, can handle droplets of condensate
> 4-in-1 sensor: Bi-directional flow, pressure, temperature and total flow
> Differential pressure flow measurement
> Standard RS485 (Modbus RTU), 4..20mA and pulse output
> 3-line display (optional) with real-time information and configuration keys
> Built-in data logger with 2 million points (optional)

Applications

> Supply side audits
> Compressor performance measurement
> Compressor efficiency monitoring (in combination with power measurement)
> High velocities (up to 200 m_n/sec | 650 sfps)
> High temperatures (up to 150°C | 302°F)
> Demand side flow measurement when dryers are not in use
> Input/ output monitoring of desiccant dryers/air treatment equipment
Supply side
- Wet air
- High velocity

VPFlowScope **DP**

Installation examples
1. RS485 (Modbus RTU) connection to Energy Management System or PLC

2. Connected to local wall mount display
3. Mobile use with build-in datalogger

VPVision or other Energy Management System/Modbus TCP converter

Connection with VPStudio
RS485 (Modbus RTU)
JB5 interface kit

VPS.R200.P4DP.x flow range table

The ranges only apply to compressed air, oxygen and nitrogen. Contact us for other gases. The field accuracy of an insertion probe is typically +/- 5% due to installation conditions.

Specifications

FLOW SENSOR

Measuring principle	Differential pressure
Flow range	20 .. 200 m/sec | 65 .. 650 sfps Bi-directional measurement (standard)
Accuracy	2% of reading over 1:10 range, under calibration conditions: please refer to the user manual for details. Recommended pipe diameter: 50 mm (2 inch) and up.
Reference conditions	0 °C, 1013.25 mbar 32 °F, 14.65 psi - DIN 1343
Gases	Wet* and dry compressed air, nitrogen and inert gases

PRESSURE SENSOR

Pressure sensor range, standard	0 .. 16 bar | 0 .. 250 psi gage
Accuracy	+/- 3% full scale (-45 .. 125 °C | -49 .. 257 °F)

TEMPERATURE SENSOR

Temperature sensor range	-40 .. 150 °C | -40 .. 302 °F. Icing should be avoided
Accuracy	+/- 1 °C | 1.8 °F

DATA OUTPUTS

Digital	RS485, MODBUS RTU protocol
Analog	4 .. 20 mA single analog / pulse output, selectable via VPStudio software

DISPLAY/DATA LOGGER

Technology	Liquid Crystal (LCD)
Back light	Blue, with auto power save
Data logger	2 million points memory

MECHANICAL & ENVIRONMENTAL

Probe lengths	386 mm | 15"
Process connection	Compression fitting, 0.5" NPT thread
Pressure rating	PN16
Protection grade	IP52 | NEMA 12 when mated to display module, avoid upside down installation IP63 | NEMA 4 when mated to connector cap, avoid upside down installation
Ambient temperature range	0 .. 60 °C | 32 .. 140 °F. Avoid direct sunlight or radiant heat
Wetted materials	Anodized aluminum, stainless steel 316, glass and epoxy
Corrosion resistance	Highly corrosive or acid environments should be avoided

ELECTRICAL

|	
Connection type	M12, 5-pin connector, female
Power supply	12 .. 24 VDC +/- 10 % Class 2 (UL)
Power consumption	3.6 Watt +/- 10% 150 mA +/- 10% @24VDC, constant over the entire flow range
UL/ CUL	14 AZ, Industrial Control Equipment
CE	EN 61325-1 (2006), Class AEN 61000-6-1 (2007)

*Note: The VPFlowScope DP is a flow meter for compressed air measurements, NOT for water measurements. Water drops are allowed. Excessive oil & water carryover conditions should be avoided.
Order codes

VPFlowScope DP

Our VPFlowScope DP products will be supplied with bi-directional measurement, ISO calibration report and compression fitting with integrated safety cable.

DESCRIPTION	ORDER CODE	
VPFlowScope DP probe 400mm/15.4" with display no datalogger	VPS.R200.P4DP	.D10
VPFlowScope DP probe 400mm/15.4" with display and datalogger	VPS.R200.P4DP	.D11
VPFlowScope DP probe 400mm/15.4"	VPS.R200.P4DP	.D0
VPFlowScope DP probe 400mm/15.4" with connector cap For Modbus networks.	VPS.R200.P4DP	.D2

Start kits

Includes VPFlowScope DP probe 400mm/15.4", display with datalogger (2m datapoints), JB5 interface kit, RS485 to USB cable, 24V power supply, compression fitting with integrated safety cable, documentation and ISO calibration report.

DESCRIPTION	ORDER CODE	
VPFlowScope DP set in a carry case Including rugged explorer case with pre-cut foam.	VPS.R200.P4DP	.KIT
VPFlowScope DP set in a box Items only, no carry case	VPS.R200.P4DP	.BOX
VPFlowTerminal with DP probe 400mm/15.4" combination kit Including 10m cable, 8 pin M12 connector cap and mini USB cable.	VPS.R200.P4DP	.VPT.KIT

Accessories

When you are installing multiple products, please see the additional accessories on page 53.

DESCRIPTION	ORDER CODE
VPFlowScope display with datalogger	VPS.D110.000
VPFlowScope display without datalogger	VPS.D100.000
VPFlowScope connector cap with 5 pin M12 connector	VPA.5001.900
Cable 5m/16.4 ft. with 5 pin M12 on one side The other side has open wires for 0V, 24V, RS485 A, RS485 B and Analog output. For permanent connection.	VPA.5000.005
Cable 10m/32.8 ft. with 5 pin M12 on one side The other side has open wires for 0V, 24V, RS485 A, RS485 B and Analog output. For permanent connection.	VPA.5000.010
5-pin M12 MALE connector (connector with screw terminal) Without cable. (No IP/NEMA rating). Used for flow meter connection or to female connector of extension cable.	VPA.5000.000
5-pin M12 FEMALE connector (connector with screw terminal) Without cable. (No IP/NEMA rating). To create extension cable and connect to male connector.	VPA.5000.001
VPFlowScope JB5 interface KIT incl. USB to RS485 converter and power supply for JB5 For connecting your VPFlowScope to VPStudio.	VPA.5001.205
Power supply adapter with 5 pin connector Useful for air audits.	VPA.0000.200
Power supply module in IP65 enclosure (230-110VAC to 24VDC) For permanent installation. This power supply module can power max 2 VPFlowScopes.	VPA.0030.100
Modbus junction box (IP65) For easy connection of multiple flow meters in a daisy chain.	VPA.5030.020
Explorer case for 2x VPFlowScope probe 400mm/15.4" With pre-cut foam inside.	VPA.5014.000
VPFlowScope DP set of 10 membrane filters and 10 o-rings Replacement part including tweezers *(for VPFlowScope DP probes starting from Serial no. 5103651).*	VPA.5100.004
VPFlowScope DP set of 24 membrane filters and 24 o-rings Replacement part including tweezers *(for VPFlowScope DP probes up to Serial no. 5103650).*	VPA.5100.003
Adjustable safety cable with integrated compression fitting for VPFlowScope DP probe	VPA.0003.006
Compression fitting 0,5" NPT for VPFlowScope Probe with teflon ferrule	VPA.0001.000
Set of 5 Teflon ferrules for compression fitting	VPA.0001.001

VPFlowScope M
Your next step in gas flow measurement

OPTIONAL

The VPFlowScope® M is a four-in-one insertion flow meter for compressed air and technical gases. It can be installed under pressure and measures thermal mass flow, pressure, temperature and total flow simultaneously. With the introduction of the VPFlowScope M, recalibration becomes history. Unlike traditional flow meters, the VPFlowScope M does not require traditional recalibration, where you have to ship the unit back. Instead, the VPFlowScope M consists of a Transmitter and the patented VPSensorCartridge® which reduces recalibration to a simple exchange.

Highlights
> 4-in-1 sensor: flow, pressure, temperature and totalized flow
> Patented Thermabridge™ technology
> Standard Ethernet (Modbus/TCP), RS485 (Modbus RTU), 4..20mA and pulse output
> Optional display with real-time information and configuration keys
> Optional data logger with 1-year automated retention policy
> Bi-directional flow measurements (optional)
> For dry, clean gas measurements
> Patented VPSensorCartridge®: no more recalibration required

Applications
> Demand side compressed air monitoring
> Air audits
> Submetering of compressed air
> Ring networks (bi-directional)
> Industrial gas monitoring (air, nitrogen, carbon dioxide, argon and other dry, noncorrosive industrial gases)
> Cost allocation
> Leak detection

VPFlowScope Probe/M

Supply side
- Wet air
- High velocity

Demand side
- Dry air
- Low to medium velocity
Installation examples
1. Connection to Energy Management System or PLC via RS485 (Modbus RTU) and/or via Ethernet (Modbus/TCP)
2. Stand-alone use with build-in datalogger With power supply adapter 12V

VPVision or other Energy Management System/ Modbus TCP converter
Connection with VPStudio
With mini USB cable
For real time data:
connect power supply adapter 12V

Specifications – Transmitter

SENSOR INTERFACE

VPSensorCartridge®	Proprietary interface, rotational 360 degrees

DISPLAY

Display type (D010 and D011)	1,8" TFT with auto power save
LED status (All models)	LED indicators on all models for power, communication and alarm

DATA LOGGER (D011 ONLY)

Memory	One-year circular memory, 1 x per second logging interval for all parameters
Logging mode	Cyclic

OUPUTS

RS485	Modbus RTU
Analog / digital	Configurable: 4 .. 20mA, pulse, alarm
USB	Mini USB, behind sealed cap (for configuration)
Ethernet	Modbus / TCP

MECHANICAL & ENVIRONMENTAL

Dimensions	50 x 108 x 36 mm	1.97 x 4.25 x 1.42 inch
Weight	220 grams	7.76 ounces including locking ring
Material	Aluminum, anodized body with polycarbonate cover
O-ring seals	NBR
Protection grade	IP65	NEMA 4 when mated to VPSensorCartridge® and USB cap tightened

ELECTRICAL

Power supply	14 VDC(1) .. 24 VDC +10% CLASS 2 (UL)
Power / RS485 / 4 .. 20 mA	M12, 5 pin
Ethernet	M12, 4 pin d-coded
Power consumption	1 Watt (no flow) 3.5 Watt (full flow) +/- 10% Varies per VPSensorCartridge® type and transmitter type
CE	EN 60950-1, EN 61326-1, EN 61000-3-2, EN 61000-3-3, EN 61326-1
UL	UL 508

(1) 12 Volt should be available at the input terminal under all flow conditions and all environmental conditions. Cable resistance and power supply impedance, which are temperature dependent, will cause permanent and transient voltage drops. These voltage drops have to be taken into account when designing and implementing the electrical installation. The VPFlowScope M continuously monitors available input voltage and will automatically turn into power save mode when the supply voltage drops below 11 Volt. For startup, a minimum voltage of 11.9 volt is required. For maximum power reliability under all circumstances, we recommend to use 24 VDC.
Specifications – VPSensorCartridge®

FLOW SENSOR

Measuring principle	Thermabridge™ Thermal Mass Flow sensor
Flow range	0 (0.5) .. 150 m/sec	0 .. 500 sfps
Bi-directional flow	Model VPM.R150.351.PN10 only
Accuracy	2% of reading under calibration conditions; Please refer to the user manual for details. Recommended pipe diameter: 25 mm (1") and up.
Reference conditions	0 °C, 1013.25 mbar	32 °F, 14.65 psi
Gases	Compressed air, nitrogen and inert, non condensing gases
Gas temperature range	0 .. +60 °C	0 .. +140 °F

PRESSURE SENSOR

Pressure sensor range	0 .. 10 bar	0 .. 145 psi gage
Accuracy	+/- 1% FSS (total error band) Temperature compensated

VPFlowScope Probe

The flow meter for all your compressed air and gas measurements

OPTIONAL

The VPFlowScope® Probe is the measurement tool for dry compressed air and other industrial gases, including oxygen, nitrogen, CO_2, helium, and argon. The VPFlowScope Probe measures thermal mass flow, pressure, temperature and total flow simultaneously.

The VPFlowScope Probe can be used in various pipe diameters, which makes it the perfect solution for measuring of both the supply side and demand side of compressed air systems. The flow meter shows you where, when and how much air is used in order to allocate cost and subsequently to save money and energy.

The bright blue LCD display provides real-time information and with the built-in data logger, you can record for certain periods of time. Combine this with our VPStudio software on your PC and you can use this information to process data, print reports and analyze where and how exactly you can save.

Highlights

> 4-in-1 sensor: flow, pressure, temperature and total flow
> Bi-directional flow measurement (optional)
> Patented Thermabridge™ technology for dry, clean gas measurements
> Standard RS485 (Modbus RTU), 4..20mA and pulse output
> 3-line LCD display (optional) with real-time information and configuration keys
> Built-in data logger with 2 million points (optional)

Applications

> Demand side compressed air monitoring
> Air audits
> Submetering of compressed air
> Ring networks (bi-directional)
> Industrial gas monitoring (air, nitrogen, carbon dioxide, argon and other dry, non-corrosive industrial gases)
> Cost allocation
> Leak detection
> 16 bar (250 psi) and 35 bar (500 psi) versions available for compressed air

VPFlowScope **Probe/M**

Supply side
- Wet air
- High velocity

Demand side
- Dry air
- Low to medium velocity
Installation examples

1. RS485 (Modbus RTU) connection to Energy Management System or PLC
VPVision or other Energy Management System/Modbus TCP converter

2. Connected to local wall mount display
3. Stand-alone use with build-in datalogger

Connection with VPStudio
RS485 (Modbus RTU)
JB5 interface kit

Specifications

FLOW SENSOR	
Measuring principle	Thermabridge™ Thermal Mass flow sensor
Flow range	0.5 .. 150 m$_n$/sec | 1.7 .. 490 sfps Bi-directional measurement (option)
Accuracy	2% of reading under calibration conditions. Recommended pipe diameter: 40 mm (1.5") and up
Reference conditions	0 °C, 1013.25 mbar 32 °F, 14.65 psi - DIN 1343
Gases	Compressed air, nitrogen and inert, non-condensing gases, 95% non-condensing gases
Gas temperature range	0 .. 60 °C | 0 .. 140 °F

PRESSURE SENSOR	
Pressure sensor range, standard	0 .. 16 bar | 0 .. 250 psi gage
Accuracy	+/- 1.5% FSS (0 .. 60 °C) | (32 .. 140 °F) Temperature compensated

TEMPERATURE SENSOR	
Temperature sensor range	0 .. 60 °C | 32 .. 140 °F
Accuracy	+/- 2% full scale (-18 .. 63 °C | -0.4 .. 145.4 °F)

DATA OUTPUTS	
Digital	RS485, MODBUS RTU protocol
Analog	4 .. 20 mA single analog / pulse output, selectable via VPStudio software

DISPLAY/DATA LOGGER	
Technology	Liquid Crystal (LCD)
Back light	Blue, with auto power save
Data logger (option)	2 million points memory

| MECHANICAL & ENVIRONMENTAL	
Probe lengths	400 mm | 15" (300 mm or 600 mm on request)
Process connection	Compression fitting, 0.5" NPT thread
Pressure rating	PN16 (PN35 on request)
Ingress Protection (IP) grade	IP52 | NEMA 12 when mated to display module, avoid upside down installation IP63 | NEMA 4 when mated to connector cap, avoid upside down installation
Ambient temperature range	0 .. 60 °C | 32 .. 140 °F. Avoid direct sunlight or radiant heat
Wetted materials	Anodized aluminum, stainless steel 316, glass and epoxy
Corrosion resistance	Highly corrosive or acid environments should be avoided

ELECTRICAL	
Connection type	M12, 5-pin connector, female
Power supply	12 .. 24 VDC +/- 10 % Class 2 (UL)
Power consumption	3.6 Watt (no flow) 4.8 Watt (full flow) +/- 10% 150 mA (no flow) 200 mA (full flow) +/- 10% @24VDC
UL/ CUL	14 AZ, Industrial Control Equipment
CE	EN 61325-1 (2006), Class AEN 61000-6-1 (2007)

Order codes

VPFlowScope Probe

Our VPFlowScope products will be supplied including ISO calibration certificate and adjustable safety cable with integrated compression fitting.

DESCRIPTION	ORDER CODE	
VPFlowScope Probe 400mm/15.4"	VPS.R150.P400	.D0
VPFlowScope Probe 400mm/15.4" with connector cap For Modbus networks.	VPS.R150.P400	.D2
VPFlowScope Probe 400mm/15.4" with display no datalogger	VPS.R150.P400	.D10
VPFlowScope Probe 400mm/15.4" with display and datalogger	VPS.R150.P400	.D11
VPFlowScope Probe 600mm/23.3"	VPS.R150.P600	.D0
VPFlowScope Probe 600mm/23.3" with connector cap For Modbus networks.	VPS.R150.P600	.D2
VPFlowScope Probe 600mm/23.3" with display no datalogger	VPS.R150.P600	.D10
VPFlowScope Probe 600mm/23.3" with display and datalogger	VPS.R150.P600	.D11

Start kits

Includes VPFlowScope Probe 400mm/15.4" (thermal mass), display with datalogger (2m datapoints), JB5 interface box, RS485 to USB cable, 24V power supply, adjustable safety cable with integrated compression fitting and calibration certificate.

DESCRIPTION	ORDER CODE	
VPFlowScope Probe 400mm/15.4" set in an explorer case with pre-cut foam inside	VPS.R150.P400	.KIT
VPFlowScope Probe 400mm/15.4" set in a box Items only, no carry case	VPS.R150.P400	.BOX
VPFlowTerminal with 400mm/15.4" VPFlowScope Probe Including 10m cable, 8 pin M12 connector cap and mini USB cable.	VPS.R150.P400	.VPT.KIT

Accessories

When you are installing multiple products, please see the additional accessories on page 53.

DESCRIPTION	ORDER CODE
VPFlowScope display with datalogger	VPS.D110.000
VPFlowScope display without datalogger	VPS.D100.000
VPFlowScope connector cap with 5 pin M12 connector	VPA.5001.900
Power supply adapter with 5 pin connector Useful for air audits. Only for D0 models - without display.	VPA.0000.200
Cable 5m/16.4 ft. with 5 pin M12 on one side The other side has open wires for 0V, 24V, RS485 A, RS485 B and Analog output. For permanent connection.	VPA.5000.005
Cable 10m/32.8 ft. with 5 pin M12 on one side The other side has open wires for 0V, 24V, RS485 A, RS485 B and Analog output. For permanent connection.	VPA.5000.010
5-pin M12 MALE connector (connector with screw terminal) Without cable. (No IP/NEMA rating). Used for flow meter connection or to female connector of extension cable.	VPA.5000.000
5-pin M12 FEMALE connector (connector with screw terminal) Without cable. (No IP/NEMA rating). To create extension cable and connect to male connector.	VPA.5000.001
VPFlowScope JB5 interface KIT incl. USB to RS485 converter and power supply for JB5 For connecting your VPFlowScope to VPStudio. Only for D0 models - without display.	VPA.5001.205
Bi-directional option for VPFlowScope Probe	VPA.5000.911
VPFlowScope Probe pressure upgrade to 35 bar | 500 psi Including double set of safety cables.	VPA.0001.092
Compression fitting 0,5" NPT for VPFlowScope Probe - SS With stainless steel ferrule. Recommended for VPFlowScope Probe with pressure upgrade to 35 bar.	VPA.0001.003
Power supply module in IP65 enclosure (230-110VAC to 24VDC) For permanent installation. This power supply module can power max 2 VPFlowScopes.	VPA.0030.100
Modbus junction box (IP65) For easy connection of multiple flow meters in a daisy chain.	VPA.5030.020
Explorer case for 2x VPFlowScope probe 400mm/15.4" With pre-cut foam inside.	VPA.5014.000
Adjustable safety cable with integrated compression fitting for VPFlowScope Probe	VPA.0003.005
Compression fitting 0,5" NPT for VPFlowScope Probe with teflon ferrule	VPA.0001.000
Set of 5 Teflon ferrules for compression fitting Spare part for the compression fitting.	VPA.0001.001

VPFlowScope In-line

lbs	1.54	1.54	3.58

The VPFlowScope® In-line is the ideal flow meter for point-of-use consumption measurement of compressed air and other industrial gases, including oxygen, nitrogen, CO_2, helium, and argon. This thermal mass flow sensor measures bi-directional flow, pressure, temperature and totalized flow simultaneously. The VPFlowScope In-line is perfect for smaller diameters where it provides all the data you need to optimize your compressed air consumption. Because of the modular design, the VPFlowScope In-line can be fitted for all your applications; from mobile to permanent measurements, from stand alone to integration into an energy management system like VPVision.

Highlights

> 4-in-1 sensor: flow, pressure, temperature and total flow
> Bi-directional flow measurement (optional)
> Patented Thermabridge™ technology for dry, clean gas measurements
> Standard RS485 (Modbus RTU), 4..20mA and pulse output
> 3-line LCD display (optional) with real-time information and configuration keys
> Built-in data logger with 2 million points (optional)
> Reversible display text

Applications

> Sub-metering of compressed air
> Leakage management
> Energy monitoring
> Cost allocation
> Industrial gas flow monitoring and submetering (N_2, O_2, He, Ar, CO_2, and other dry, non-corrosive industrial gases)
> 16 bar (250 psi) and 35 bar (500 psi) versions available for compressed air

VPFlowScope **In-line**
Installation examples

1. RS485 (Modbus RTU) connection to Energy Management System or PLC

1. VPA.5030.020
2. VPA.5000.005/010

VPVision or other Energy Management System/Modbus TCP converter

2. Connected to local wall mount display
3. Stand-alone use with build-in datalogger
Connection with VPStudio

For D0: RS485 (Modbus RTU) JB5 interface kit

For D10, D11: USB + 24VDC power supply

Specifications

FLOW SENSOR

Measuring principle	Thermabridge™ Thermal Mass flow sensor
Flow range 0.5 inch	0.23 .. 80 m³ₙ/hr | 0.13 .. 50 SCFM
Flow range 1 inch	0.91 .. 250 m³ₙ/hr | 0.54 .. 150 SCFM
Flow range 2 inch	3.55 .. 1000 m³ₙ/hr | 2.15 .. 600 SCFM
Accuracy	0.5% FSS with calibration report under calibration conditions with air
Reference conditions	0 °C, 1013.25 mbar | 32 °F, 14.695 psi
Gases	Compressed air, nitrogen, oxygen and inert, non-condensing gases, 95% non-condensing gases
Gas temperature range	0 .. 60 °C | 32 .. 140 °F

PRESSURE SENSOR

Pressure sensor range	0 .. 16 bar | 0 .. 250 psi gauge (35 bar | 500 psi on request)
Accuracy	+/- 2% full scale (-18 .. 63 °C | -0.4 .. 145.4 °F)

TEMPERATURE SENSOR

Temperature sensor range	0 .. 60 °C | 32 .. 140 °F
Accuracy	> 10 mₙ/sec: +/- 1 °C | 1.8 °F < 10 mₙ/sec: + 5 °C | 9 °F due to self-heating of the flow sensor

DATA OUTPUTS

Analog	4 .. 20 mA or pulse, selectable via installation software
Serial IO	RS485 (Modbus RTU)
USB	Mini USB interface for configuration (display version only)

DISPLAY/DATA LOGGER

Technology	Liquid Crystal (LCD)
Back light	Blue, with auto power save
Data logger (option)	2 million points memory

DIMENSIONS & WEIGHT

0.5 inch	135 mm x 50 mm x 85 mm | 5.31" x 1.97" x 3.35"	0.7 Kg | 1.54 lbs
1 inch	135 mm x 55 mm x 91 mm | 5.31" x 1.97" x 3.58"	0.7 Kg | 1.54 lbs
2 inch	155 mm x 90 mm x 125 mm | 6.10" x 3.54" x 4.92"	1.6 Kg | 3.58 lbs

MECHANICAL & ENVIRONMENTAL

Ingress Protection (IP) grade	IP65 when mated to connector, at room temperature; direct rain and sunlight should be avoided. Extreme temperature fluctuations may affect the IP grade over time.
Ambient temperature range	0 .. 60 °C | 32 .. 140 °F
Wetted materials	Body: Anodized aluminum | Sensor: Silicon, epoxy, glass | Sealing: FTM 60, Polyurethane

ELECTRICAL

Connection type	M12, 5-pin connector, female and optional USB mini connector
Power supply	12 .. 24 VDC +/- 10 % Class 2 (UL)
Power consumption	2.4 Watt (no flow) 4.8 Watt (full flow) +/- 10% 100 mA (no flow) 200 mA (full flow) +/- 10% @24VDC
UL/ CUL	14 AZ, Industrial Control Equipment
CE	EN 61326-1(2006) Class A, EN61000-6-1 (2007)

Order codes

VPFlowScope In-line

Our VPFlowScope In-line products will be supplied including ISO calibration certificate (all models) and mini USB cable (display models).

DESCRIPTION	ORDER CODE
Cable, 5m / 16.4 ft. with M12 5pin connector on one side The other side has open wires for 0V, 24V, RS485 A, RS485 B and Analog output. For permanent connection.	VPA.5000.005
Cable, 10m / 32.9 ft. with M12 5pin connector on one side The other side has open wires for 0V, 24V, RS485 A, RS485 B and Analog output. For permanent connection.	VPA.5000.010
5-pin M12 MALE connector (connector with screw terminal) Without cable. (No IP/NEMA rating). Used for flow meter connection or to female connector of extension cable.	VPA.5000.000
5-pin M12 FEMALE connector (connector with screw terminal) Without cable. (No IP/NEMA rating). To create extension cable and connect to male connector.	VPA.5000.001
VPFlowScope JB5 interface kit For connecting your VPFlowScope In-line to VPStudio. Incl. USB to RS485 converter and power supply for JB5. Only for D0 models - without display.	VPA.5001.205
Power supply adapter with 5 pin connector Useful for air audits.	VPA.0000.200
VPFlowScope bi-directional option for In-line	VPA.5000.912
Helium gas calibration for In-line flow meters Including calibration certificate.	VPA.0001.912
Special gas calibration for In-line flow meters Other gases then Helium calibration. Including calibration certificate.	VPA.0001.915
Extra costs for additional units special gas calibration Additional units, when processed in the same order for the same gas. Including calibration certificate.	VPA.0001.913
VPFlowScope In-line pressure upgrade to 35 bar | 500 psi	VPA.0001.093
Power supply module in IP65 enclosure (230-110VAC to 24VDC) For permanent installation. This power supply module can power max 2 VPFlowScopes.	VPA.0030.100
Modbus junction box (IP65) For easy connection of multiple flow meters in a daisy chain.	VPA.5030.020

VPFlowScope In-line 3/8"

The perfect solution for low flows of compressed air or oxygen
The VPFlowScope In-line 3/8" is the perfect solution to measure low flows of compressed air and oxygen.
Getting insight results in: reduction of consumption, allocation of costs and optimization of your air/oxygen system.

The VPFlowScope In-line 3/8" measures flow, total flow and temperature. Thanks to the patented Thermabridge™ technology, the VPFlowScope In-line can perform bi-directional flow measurements.
The built-in display will show the actual and total flow, and the Modbus and analog 4..20 mA outputs enable you to interface with VPVision or other monitoring systems.

Highlights

> Measures flow, total flow and temperature simultaneously
> Patented Thermabridge™ technology for dry, clean gas measurements
> RS485 (Modbus RTU) + 4..20 mA output
> TFT display with real-time information and configuration keys
> Power and communication LEDs
> Easy to install and compact size

Applications

> Point of use in compressed air systems
> Output of oxygen generators
> Consumption measurement
> Leakage measurement
> Cost allocation and measuring your distribution network

Specifications

Measuring principle	Thermabridge™ thermal mass flow sensor
Flow range	2.15..50 l/min | 0.09..1.77 CFM
Accuracy	5% of full scale under calibration conditions
Temperature sensitivity	< 1% of measured value per °C
Reference conditions	20 °C, 1000 mbar | 68 °F, 14.50 psi
Gases	Oxygen and compressed air
Gas temperature range	20 .. 32 °C | 68 .. 89.6 °F
Display type	1.8" TFT color with auto power save
LED status	LED indicators on all models for power and communication
Outputs	RS485 (Modbus RTU), 4 .. 20mA
Material	Brass, polycarbonate
Wetted materials	Brass, Ceramic, Polyurethane, Viton
Protection grade	IP54 | NEMA 3
Ambient temperature	0 .. 50 °C | 32 .. 122 °F
Ambient humidity	0 .. 95 %. Avoid condensation at all times
Pressure rating	10 bar | 150 psi gage
Electrical supply	14 VDC .. 24 VDC +10% CLASS 2 (UL)
Power consumption	1 Watt (no flow) 3.5 Watt (full flow) +/- 10%
Certification CE	EN 60950-1, EN 61326-1, EN 61000-3-2, EN 61000-3-3, EN 61326-1
Electrical connection	M8 5-pin female connector
Mounting connection	Mount between pipe ends using Hylok SICMC-6-6G

- Avoid direct sunlight or radiant heat.
- Highly corrosive or acid environments should be avoided.

VP Dew Point Sensor

The wide range dew point sensor
for all your measurement
applications

The VP Dew Point Sensor is the complete dew point sensor for all your measurement applications. It is designed for ease of use, incorporating all the features needed to make installation and operation as simple as possible. The sensor is robust and smart with its autocalibration functionality. With both 4..20 mA and RS485 (Modbus RTU) outputs, you can connect the sensor to VPVision or other management systems.

Highlights

> Large measurement range: -70..60°C | -94..140°F
> Built-in alarm function and LED
> Sensor highly resistant to condensation and particulate contamination
> Long-term high performance due to state-of-the art polymer technology
> RS485 (Modbus RTU) and 4..20 mA output
> Auto-calibration
> Optional external display
> Optional sampling block with bleed valve

Applications

> Monitoring compressed air quality of refrigerant and desiccant type air dryers
> Point-of-use dew point measurement
> Permanent measurement
> Guard critical processes e.g. in the semi-conductor, paint, pharmaceutical, food & beverage, and automotive industries
> Monitor demand air at machine/process level

Specifications

MEASUREMENT PERFORMANCE

Sensor	Thin film polymer
Sensor protection	Stainless steel sintered filter
Calibration interval	Recommended calibration interval to confirm the specified accuracy of 2 years
Sample flow rate	No effect on measurement accuracy, only on response time

RESPONSE TIME 63% [90%] AT 20 °C | 68 °F GASTEMPERATURE AND 1 BAR (14.5 PSI) PRESSURE

-60 → -20 °C Td (-76 → -4 °F Td)	5 s [15 s]
-20 → -60 °C Td (-4 → -76 °F Td)	45 s [10 min]

DEW POINT TEMPERATURE

|	
Measurement range (typical)	-70 .. 60 °C	-94 .. 140 °F
Accuracy in air or N_2	±2 °C	±3.6 °F	±68 °F of reading
Temperature (°C) > 12 bar	Accuracy ±4 °C	±7.2 °F of reading

WATER CONCENTRATION BY VOLUME (PPM)

Accuracy at 20°C	68 °F, 1 bar pressure	1 ppm + 20% of reading

INPUTS AND OUTPUTS

Analog output (scalable)	4 .. 20 mA
Resolution for current output	±0.002 mA
Accuracy for current output at 20 °C (68 °F)	±0.05 mA
Typical temperature dependence	0.005% of span / °C
LED	For dew point level alarm and transmitter diagnostics
Digital output	RS485 2 wire, non-isolated, RS485 (Modbus RTU)

ELECTRICAL

Supply voltage with current output	18 .. 28 VDC
Supply voltage with RS485	12 .. 28 VDC
Supply voltage, in pressures over 20 bara (290 psia) or temperatures below 0 °C (32 °F)	24 .. 28 VDC
Supply current during normal measurement	Max. 10 mA + load current
Supply current during self-diagnostics	Max. 220 mA pulsed
Load for current output	Max. 500 kΩ
Load for voltage output	Min. 10 kΩ

MECHANICAL

Mechanical connection	ISO G1/2"
Housing material	Stainless steel (AISI316L)
Weight	G-thread version 90 g	3.2 oz
Ingress Protection	IP66	NEMA4

External Display 420

Monitor your dew point locally with the External Display 420. The display is available with 2 optional built-in alarm relays, which can be used to trigger an external alarm, for example via your BMS/ SCADA system.

The display has one port to read out one dew point sensor at the time. The External Display 420 is compatible with all VPInstruments dew point sensors.

Sampling blocks

Protect your dew point sensor from fouling and failure by using a sampling block, e.g. for protection against a high process temperature, against water spikes, and for ease of servicing. Moreover, sampling blocks are manufactured from a single, machined stainless steel block, reducing the number of pipe joints, internal volume and surface area. As a result, the sampling system has a faster response and higher integrity.

VPInstruments sampling blocks can be fitted with a needle valve or silencer, depending on the model, to regulate the optimum gas flow for the sensor. We offer all the accessories in a complete kit.
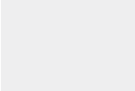

Order codes

VP Dew Point Sensor

DESCRIPTION	ORDER CODE
VP Dew Point Sensor BSP (-70 to +60 °C | -94..140 °F). Dew point sensor only.	VPA.8000.1018
Dew Point Sensor kit Including VP Dew Point Sensor (BSP), cable 10m / 32.8 ft. for analog- or Modbus connection, sample block, bleeding valve, accessories. Includes calibration certificate.	VPA.8000.1019

Accessories

DESCRIPTION	ORDER CODE
Sampling block Including sample blok, bleeding valve and accessories. With 3/8" BSP female connection. Create the optimum gas flow over the sensor for stable and continuous accurate measurements.	VPA.8000.1514
Special o-rings (3 pieces) Install your dew point sensor without teflon tape, the O-rings are reusable.	VPA.8000.1515
USB service cable To configure the VP Dew Point Sensor , for instance changing Modbus settings.	VPA.8000.1511
Cable 10m / 33ft for VP Dew Point Sensor M8 4-pin connector on one side and 4 open wires on the other side.	VPA.8000.1510
Replacement filter	VPA.8000.1516
Adapter 1/2" NPT to 3/8 inch BSP	VPA.8000.1517
External Display 420 Monitor your dew point locally. The display has one port to read out one dew point sensor at the time.	VPA.8000.1512
External Display 420 with alarm relay With 2 optional built-in alarm relays, which can be used to trigger an external alarm, for example via your BMS/ SCADA system.	VPA.8000.1513

Dew Point Sensor – Extreme Dry Air

For extreme dry applications

Specifications

PERFORMANCE	
Measurement range	-100 .. 20°C	-148 .. 68 °F dew point
Accuracy (dew point):	±2 °C	±3.6 °F dew point
Response time	5 mins to T95 (dry to wet)

ELECTRICAL OUTPUT/INPUT	
Output signal	4 .. 20 mA (2-wire) current source, configurable over the entire range
Supply voltage	12-28VDC
Current consumption	20 mA max
Supply voltage influence	±0.005% RH/V

OPERATING CONDITIONS)	
Operating humidity	0 .. 100% RH
Operating temperature	-40 .. 60°C	-40 .. 140 °F
Operating pressure	450 barg max.
Temperature coefficient	Temperature compensated across operating temperature range

MECHANICAL SPECIFICATIONS	
Ingress protection	IP65	NEMA 4
Housing material	Stainless steel
Dimensions	L=132mm x ø27mm	5,2 x 1,1"
Filter	HDPE Guard <10 µm
Process connection	5/8" - 18 UNF
Connection	DIN connector

The Dew Point Sensor - Extreme Dry Air has a measurement range up to as low as -100°C / -148 °F. Therefore it is recommended for extreme dry applications.

Highlights

> 2-wire loop powered connection
> Dew point or ppm moisture content
> IP65 (NEMA 4)
> Fast response time

Applications

> Monitoring compressed air quality of desiccant type air dryers
> Point-of-use dew point measurement
> Permanent measurement
> Guard critical processes e.g. in the semi-conductor, paint, pharmaceutical, food & beverage, and automotive industries
> Monitor demand air at machine/process level

3 Phase Power Meter

True power measurement

RS485

3 Phase Power Meter

With the VPInstruments 3 Phase Power Meter, combined with Current Transformers, you can measure the voltage and current of all three phases. Thereby, it provides a high accuracy measurement of the real power consumption. It provides power, voltage, current, cos(phi) and many more electrical parameters via the RS485 (Modbus RTU) interface. The Modbus interface allows the meter to be easily connected to a monitoring system. And when combined with one or more flow meters, you can monitor compressor efficiency in real-time.

Highlights

> True RMS power measurement of single-phase or three-phase systems
> One size fits all: one model for 100 to 600 Vac, 50 / 60Hz
> RS485 (Modbus RTU) output
> Wye or delta in one model
> For permanent installation
> 0.3333 VAC input for current transformers (CT)
> LED indicator for CT status and serial communication
> Configurable using Modbus

Applications

> Power consumption of large consumers (i.e. compressors, dryers, pumps, water chillers)
> Submetering
> Cost allocation
> Baseline condition monitoring
> Energy management
> Efficiency calculations (i.e. compressor electrical usage vs output)

Specifications

POWER METER	
Accuracy	± 0.5% reading
Power supply	Power from measured voltage < 2 W
Voltage input	100 .. 600 (L to N), 100 .. 600 (L to L)
Current input	5 .. 1500 Amps per phase
Output	RS485 (Modbus RTU), 2 wire
Size	143 × 85 × 38 mm	5.63 × 3.34 × 1.5"
Weight	233 g	8.2 oz
Environment	Indoor use
Operational temperature	-30 .. 55 °C	-22 .. 131 °F
Operational humidity	Non-condensing, 5 to 90% relative humidity
Operating frequencies	50 / 60 Hz
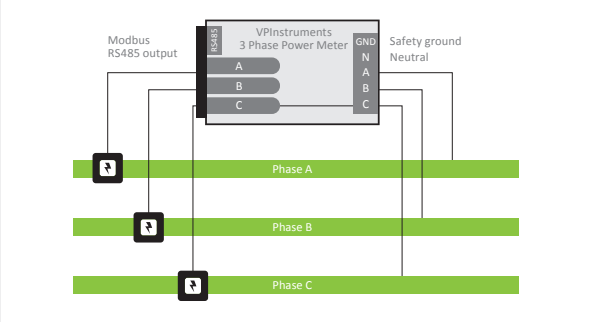

Selection is easy due to the wide voltage range of the 3 Phase Power Meter. The same meter can be used for all nominal voltages between 100 Vac and 600 Vac, for delta and wye configurations at 50 Hz or 60 Hz. In addition, you will need to specify a current transformer (CT) for each phase. For delta systems you may only need two CTs. To determine your size of current transformer, check the maximum amperage and be sure to account for the input power factor (cos(phi)), minimum input voltage and other factors. The 3 Phase Power Meter is compatible with VPInstruments' current transformers or any other, that has a 0.3333 Vac output.

VPLog-i

Quick and easy power measurements

VPLog-i

Specifications

	VPLOG-I	VPLOG-I-R
Accuracy	± 1% full scale	
Power supply	6 .. 30 Vdc	7 .. 28 Vdc
Power consumption	4 .. 20 mA	11 mA
Current input	5 models available from 100 to 1500 Amps	100 .. 1600 A-rms. Insulated cables only
Outputs	4 .. 20 mA: proportional to the measured input. Pulse: pulse frequency is proportional to the current measured.	RS485 (Modbus RTU). Output of true RMS current, frequency and current at base frequency.
LED	Feedback on power connection	Feedback on Modbus communication
Pulse rate	0 .. 2.66 Hz	N.A.
Coil diameter	7 mm | 0.28"	6 mm | 0.24"
Coil bend radius	35 mm | 1.38"	30 mm | 1.18"
Housing W x H x D	26.7 x 41.4 x 13.6 mm | 1.1 x 1.6 x 0.6"	
Operation temperature range	-20 .. 70 °C | -4 .. 158 °F	
Operational relative humidity	Max 95%, non-condensing	
Coil length	170 mm | 6.7", 250 mm | 9.8"	250 mm | 9.8"
Operating frequencies	50 / 60 Hz	50 Hz

The VPLog-i and VPLog-i-R cannot be combined with the 3 Phase Power Meter.

The VPLog-i is a Rogowski type meter that measures AC currents up to 1500A-rms (true-RMS on a single-phase power cable). The VPLog-i is very easy to use; just wrap around one of the three-phase power cables and close the snap fitting. The LED provides feedback. The VPLog-i offers the best solution for power measurements in audits. The sensor can also be used for permanent installation. In this case, cos(phi) has to be estimated, and voltage needs to be measured once. These parameters are used to calculate the estimated power consumption. In VPVision, you simply enter these numbers in the power meter configuration wizard.

The VPLog-i is available in two models, where the main difference is the output signal. The VPLog-i offers a 4..20mA and pulse output. The VPLog-i-R features an RS485 (Modbus RTU) output.

Highlights

> Very easy and quick installation
> Plug and play
> For short-term and permanent measurements
> One size fits all VPLog-i-R model with RS485 interface

Applications

> Power consumption of large consumers (i.e. compressors, dryers, pumps, water chillers)
> Submetering
> Cost allocation
> Baseline condition monitoring
> Energy management
> Efficiency calculations (i.e. compressor electrical usage vs output)

VPVision

Real time energy monitoring

VPVision is the complete real time energy monitoring solution for all utilities within your company. By monitoring your consumption, you will see the patterns on your supply and demand side. Take factual and well founded decisions on your costs and investments. Reveal the consumption of all utilities, including compressed air, technical gases, steam, vacuum, natural gas, electricity, waste water, heating fuels etc.

VPVision enables you to view data on any platform, from PC to smartphone. It will help your organization to raise the energy awareness among your staff. It will be your guiding hand to target energy savings for individuals, teams or at a company-wide level.

Highlights

> Complete energy monitoring for all your utilities
> On-premise data storage, safe and secure
> Complete web-based Energy Management software with customizable screens
> Accessible via Ethernet and/or secure VPN
> Visualize your measurement data in easy dashboards, including KPI's, charts, graphs, consumption overviews, P&IDs, and more
> Automated PDF reports with e-mail function and alarm messages: no need to look at the system itself anymore
> Easy to use interface
> Flexible & Scalable: Start small and extend over time, limitless in sensors
> Supports your ISO 50001 Energy Management System

Technology

VPVision consists of an industrial PC with LAN ports in a dedicated cabinet with pre-installed Modbus terminal, analog input module, power supply and VPN Router. VPVision collects all data, once per second, and stores it securely in the SQL database. The averaged per minute data is made available real-time via a built-in web server, which can be accessed from any pc, tablet or smartphone.

VP(n)Router

Easy and safe remote access

Read out, service and monitor VPVision and connected Ethernet-based sensors/modules, from anywhere. The VPRouter makes it convenient to connect to your VPVision via a cellular network, independent of the customer's own LAN. Especially in applications where an internet connection is not available or where a dedicated VPN connection outside of the existing network, is preferred, the VPRouter is the secure solution. With the VPRouter your VPVision is just a few clicks away. Just login on your Cloud account, select the system you would like to see, and view VPVision directly in your web browser. Are you responsible for multiple sites and compressed air systems? No problem! One Cloud account can host numerous VPN modules.

Benefits

> No costly on-site visits for data readout
> Allows for remote support and updates
> Can be used as local switch with 4 ports
> Multiple sites in just 1 Cloud account
> Easy installation on a standard DIN rail
> Save & Secure connection: the VPRouter is designed with an advanced firewall and the highest IT security standards
> Lifetime VPN Portal included at no extra cost (cloud.vpinstruments.com)

VPFlowTerminal
Plug & play wall mount display

The VPFlowTerminal is a plug & play wall mount display with built-in power supply and 2 million point data logger. The VPFlowTerminal has 5 sensor inputs: 1 input for a VPFlowScope In-line, Probe or DP, and 4 generic analog inputs. It can record up to 8 channels. This makes the collection and analysis of your compressed air data easier and quicker!

Highlights
> Wall mount display
> Built-in data logger with 2 million point data logger
> 1 x VPFlowScope input (Probe, DP, In-line)
> 4 Analog input channels
> 3-line display with real-time information and configuration keys
> Built-in power supply
> Easy data retrieval via USB and VPStudio software to .CSV file

Specifications

VPFLOWTERMINAL	
Input voltage	100 .. 240 Vac mains (pre-wired)
Housing type	Painted Aluminum IP65	NEMA 4
Display	LCD, 3 lines
Back light	Blue with auto power save
Data logger	Two million point data logger
Signal inputs	VPFlowScope + 4 optional 4 .. 20 mA sensors (non - isolated, loop powered)
Sensor power supply	24 VDC
Maximum sensor current	4 x 25 mA for analog sensors, 1 x 150 mA for VPFlowScope
Data outputs	USB for configuration and data retrieval
Ethernet interface	Modbus / TCP port
Basic configuration	Via key pad
Flow meter connection	M12, 8 pin
Additional connections	Cable glands for analog inputs, Ethernet connection
Dimensions	l x b x h = 230 x 130 x 75 mm, 9.1 x 5.1 x 2.95"

Pipe materials	steel, stainless steel

The hot tap drill is the universal tool to install your insertion flow meter in any compressed air system. In only 30 minutes you can drill a hole and install your flow meter. Using a hot tap saddle and a hot tap drill, you can create a new installation point without depressurizing your installation. The VPInstruments hot tap drill can be used for drilling through a hot tap saddle with a 1" fitting.

Highlights

> Make an installation point without depressurizing your system
> Hand operated: no power tool needed on-site
> Safe and easy operation
> Versatile
> For applications up to 10 bar
> 1" Hot tap drill size
> All accessories included
> Explorer® transport case included

VPStudio
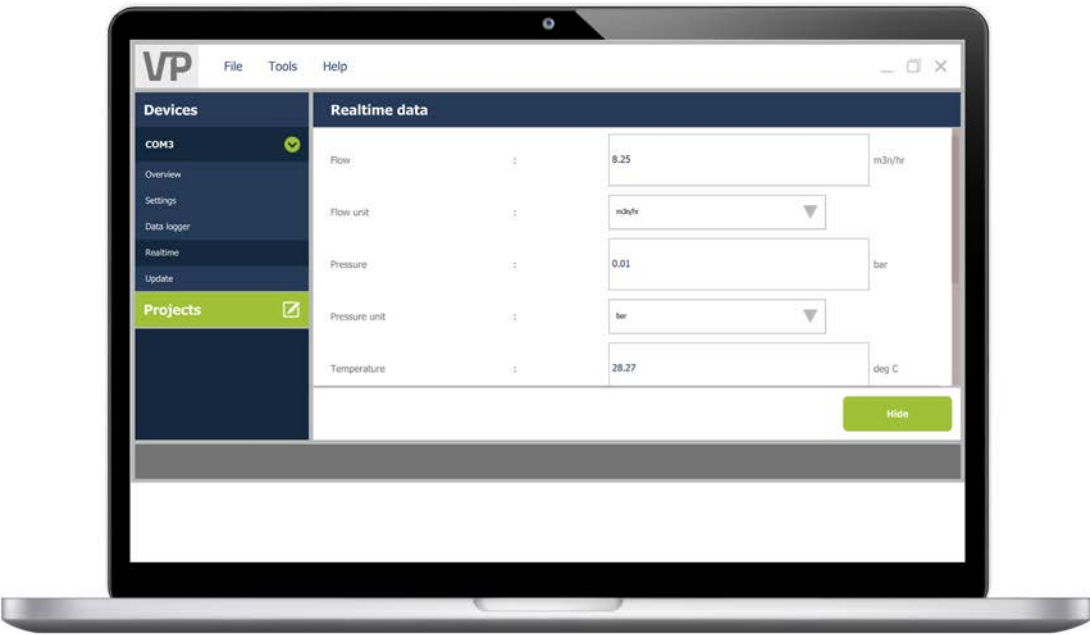

Correct flow measurements start with entering the correct inner pipe diameter into your flow meter. You program this easily via the display keypad or via the VPStudio software. For non-display models, the diameter can only be set via the software. VPStudio can be installed on your PC. Pending your VPFlowScope, you require the JB5 interface KIT or the mini USB cable for connection to the PC and thus VPStudio.

Features of VPStudio
> Setting your pipe diameter
> View real time measurements
> Viewing and retrieving your (air audit) data log sessions in a structured manner in the Projects module
> Setting your logging intervals
> Setting your Modbus and networking parameters
> Spanning the analogue output to 4..20 mA or Pulse

All-in service

DESCRIPTION		ORDER CODE
Inspection only Inspection of your returned equipment only. After inspection you decide if VPInstruments has to repair or return the equipment to you. In case of a repair the cost for the inspection will NOT be refunded.		VPA.0001.0900
All-in service This includes inspection, all necessary repairs and recalibration. After this service your equipment comes with calibration report and an additional 12 months of full warranty.	For VPFlowScope In-line	VPA.0001.0901
	For VPFlowScope Probe	VPA.0001.0902
	For VPFlowScope DP	VPA.0001.0903
	For VPFlowTerminal	VPA.0001.0904
	For the display of a VPFlowScope	VPA.0001.0905
	For a VPFlowScope M Transmitter	VPA.0001.0906

Options

DESCRIPTION		ORDER CODE
International daily rate for commissioning and supervision For details see VP Instruments international on-site support agreement.		VPA.0001.908
Helium gas calibration (Including calibration certificate).	For VPFlowScope In-line	VPA.0001.912
	For VPFlowScope Probe	VPA.0001.921
Special gas calibration **Other gases then helium calibration** (Including calibration certificate).	For VPFlowScope In-line	VPA.0001.915
	For VPFlowScope Probe	VPA.0001.951
Extra costs for additional special gas calibration Additional units, when processed in the same order for the same gas (including calibration certificate).		VPA.0001.913
Oil and grease free product cleaning Labelled and packed in double sealed bags.		VPX.070.000

Exchange

Prior to sending back your flow meter we will send you a flow meter of the same model with a full year warranty. The Exchange Service only pertains to the D0 versions. Displays and other accessories are not included in the Exchange Service, as they do not need recalibration.

DESCRIPTION		ORDER CODE
Exchange service	For VPFlowScope In-line	VPA.0001.1901
	For VPFlowScope Probe	VPA.0001.1902
	For VPFlowScope DP	VPA.0001.1903

Rental

For temporary application or project needs

RENT

For temporary application or project needs, we offer various rental flow meters. These flow meters can be rented per week and come calibrated and ready to use.

	Rental VPFlowScope In-line (all models)	after 1st week	VPA.0001.809

General accessories

JB5 interface kit

The interface kit, which is included in the VPFlowScope start kit, can also be ordered as a separate item. The JB5 interface kit is needed to connect your flow meter to the PC with VPStudio. In the interface kit, you will find a splitter box with pre-mounted M12 cable, a DC power supply and an RS485 to USB converter.

**Specifications**

Mechanical & Environmental

Temperature: -20 ~ 50°C | -4 ~ 122°F
Weight: 0.9 kg | 1.98 lbs

Electrical

Supply input (mains): 100 - 240 VAC
Output: 12 - 24 VDC
Cable: 5 meter | 16.4 foot cable with M12
5-pin connector
RS485 output: via RS485 to USB converter

Power supply module

The VPInstruments power supply module has been developed for the permanent installation of maximum two VPFlowScopes. However, the power supply module can be used to power up any device at 24 VDC up to 1 ampere. The field enclosure of the power supply module is rated IP65, which means it is well protected from dust and splashing water. The module can be wall mounted.

Specifications

Mechanical & Environmental

Construction: IP65 ABS enclosure
Temperature: -20 ~ 40°C | -4 ~ 104°F
Weight: 0.9 kg | 1.98 lbs
Outer dimensions: 160 x 120 x 140 mm
| 6.30" x 4.72" x 5.51"

Electrical

Supply input (mains): 110 - 250 VAC, 50 - 60Hz
Supply output: 24 VDC 24 Watt

Modbus junction box

VPInstruments offers a convenient junction box for quick and easy connection between VPFlowScope sensor modules and your Modbus RS485 network. This junction box contains a special PCB, with screw terminals for the Modbus trunk cable and the derivation cable. The built-in LED indicates when the sensor has sufficient power. This feature is very handy to check voltage drops over longer distances.
Specifications

Aluminum IP65 enclosure
3 high quality cable glands included
Built-in PCB with termination resistor and bias resistors
LED indicator for power

Constructions

Aluminum enclosure, painted

Dimensions

125 x 80 x 57 mm | 4.92 x 3.15 x 2.24 inch

Remote IO Modules

Modbus extension module with power supply

Modbus extension module with power supply. DIN rail mounted converter and power supply built into an IP65 plastic enclosure. With this module you can power up another 8 VPFlowScopes in a daisy chain.

Applications

> For permanent installations
> To extend and power up another 8 VPFlowScopes
> To power up sensors that are too far away in the daisy chain to be powered by the VPVision M main unit or a converter box

Modbus to Ethernet converter with power supply

With this module you can transfer Modbus signals over Ethernet to the VPVision M unit or an existing building management system. It is an extension module for VPFlowScopes (max 8 per converter box). A power module is added to power these 8 sensors.

Applications

> For permanent installations
> To overcome great distances for sensor communication between master and slave
> When cables are too expensive
> To extend and power up another 8 VPFlowScopes

Analogue to Ethernet converter with power supply

Analogue input module with power supply. DIN rail mounted power supply module with analogue converter. Built in IP65 plastic enclosure. With this converter you can transfer 4..20 mA analogue signals over Ethernet to the VPVision M unit or an existing building management system. It is an extension module to add more analogue sensors (max 8 per converter box). A power module is added to power these 8 sensors.

Applications

> For permanent installations
> When you need to implement extra analogue input channels
> When cables are too expensive
> When analog signals need to be carried over Ethernet
> To power up another 8 analogue sensors

Analogue and Modbus to Ethernet converter with power supply

Analogue and Modbus converter with power supply, mounted on a DIN rail. Built in IP65 plastic enclosure. With this converter you can transfer 4..20 mA analogue and Modbus signals over Ethernet to the VPVision M unit or an existing building management system. It is an extension module for more analogue sensors (max 8 per converter box) and more VPFlowScopes (also max. 8 per converter box). A power module is added to power these 16 sensors.

Applications

> For permanent installations
> When you need to implement extra analogue input channels
> When cables are too expensive
> When analog signals need to be carried over Ethernet
> To extend and power up another 8 analogue sensors
> To extend and power up another 8 VPFlowScopes

Accessories

DESCRIPTION	ORDER CODE
Cable 5m/16.4 ft. with 5 pin M12 on one side The other side has open wires for 0V, 24V, RS485 A, RS485 B and Analog output. For permanent connection.	VPA.5000.005
Cable 10m/32.8 ft. with 5 pin M12 on one side The other side has open wires for 0V, 24V, RS485 A, RS485 B and Analog output. For permanent connection.	VPA.5000.010
5-pin M12 MALE connector (connector with screw terminal) Without cable. (No IP/NEMA rating). Used for flow meter connection or to female connector of extension cable.	VPA.5000.000
5-pin M12 FEMALE connector (connector with screw terminal) Without cable. (No IP/NEMA rating). To create extension cable and connect to male connector.	VPA.5000.001
Cable for RS485 / Modbus network	VPA.0000.150
VPFlowScope JB5 interface KIT incl. USB to RS485 converter and power supply for JB5 For connecting your VPFlowScope to VPStudio. Only for D0 models - without display.	VPA.5001.205
Power supply adapter with 5 pin connector Useful for air audits.	VPA.0000.200
Modbus junction box (IP65) For easy connection of multiple flow meters in a daisy chain.	VPA.5030.020
Power supply module in IP65 enclosure (230-110VAC to 24VDC) For permanent installation. This power supply module can power max 2 VPFlowScopes.	VPA.0030.100
Explorer case for 2x VPFlowScope Probe 400mm/15.4"	VPA.5014.000
Explorer case for VPFlowScope Probe 400mm/15.4" & VPFlowScope In-line 1"	VPA.5014.001
Explorer case for VPFlowScope M	VPA.5014.002

Remote IO modules

DESCRIPTION	ORDER CODE
Modbus extension module with power supply For extra power (24V) to a long daisy chain.	VPA.5030.011
Modbus to Ethernet converter with power supply For one extra Modbus daisy chain.	VPA.5030.111
Analogue to Ethernet converter with power supply Includes 8 analog inputs.	VPA.5030.211
Analogue and Modbus to Ethernet converter with power supply Includes 8 analog inputs and one Modbus daisy chain.	VPA.5030.311
Modbus RTU to HART converter For VPFlowScope Probe, DP, M and In-line flow meters.	VPA.5030.500
